

Project Initialization and Planning Phase

Date	01 October 2026
Team ID	SWTID-2026-1564
Project Name	Courier Management System
Maximum Marks	3 Marks

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges.

Customer Problem Statements for the Courier Management System:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Branch Manager	Manage shipments efficiently	Tracking is spread across different records	Information is kept in separate registers or spreadsheets	Burdened by extra follow-up work
PS-2	A Customer	Know the current status of my parcel	Updates may not be centralized	There is no single place where shipment status is recorded	Uncertain about my delivery
PS-3	A Delivery Agent	Receive clear delivery assignments	Information may be shared manually	Assignments are not linked to shipment records	Worried about missing updates
PS-4	A Customer Support Staff member	Answer tracking queries quickly	I need to check multiple records	Customer, shipment and agent data are not connected	Slow and under pressure
