

Empathy Map

Date	01 October 2026
Team ID	SWTID-2026-1564
Project Name	Courier Management System
Maximum Marks	4 Marks

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. The primary persona for this project is the **Branch Manager**, because this role needs visibility across shipments, agents and branch-level activities.

SAYS • "I need to know where each parcel is." • "Which agent is handling this shipment?" • "Why was this delivery delayed?"	THINKS • Wants fewer delays and clear control • Records should be in one place • Manual follow-ups waste time
BRANCH MANAGER (Primary persona - manages shipments, agents and delivery updates for a branch)	
DOES • Checks shipment status and follows up • Reviews spreadsheets and shipment lists • Coordinates with delivery agents and customers	FEELS • Pressured by customer complaints • Frustrated by scattered information • Confident when status is visible in one system

Supporting observations: The manager **hears** customer complaints and team updates, and **sees** spreadsheets, shipment lists and alerts. These inputs motivate a single system that centralizes shipment, agent and delivery information.
