| <b>Project Name</b>  | Courier Management System |
| <b>Maximum Marks</b> | 5 Marks                   |

### Functional Features Overview:

Functional features included in the Courier Management System, with purpose, implementation status and contribution to the solution.

| S.No | Feature Name                 | Feature Description                                                                            | Module / Component | Status (Done / In Progress / Pending) | Marks Contribution |
|------|------------------------------|------------------------------------------------------------------------------------------------|--------------------|---------------------------------------|--------------------|
| 1    | Custom Objects & Tabs        | Customer, Shipment, Delivery Agent, Branch, Delivery Update and Invoice objects with tabs      | Data Model         | Done                                  | High               |
| 2    | Fields & Relationships       | Fields for each object; Lookup and Master-Detail relationships                                 | Data Model         | Done                                  | High               |
| 3    | Validation Rules             | Email, phone, pincode, weight, price, date, agent email, branch code and delayed-remark checks | Automation         | Done                                  | High               |
| 4    | Status Automation Flow       | Record-triggered Flow copies Delivery Update status to Shipment                                | Automation         | Done                                  | High               |
| 5    | Lightning App & Page Layouts | App with CMS tabs; grouped sections on record pages                                            | User Interface     | Done                                  | Medium             |
| 6    | Profiles, Roles & Users      | Courier Admin, Branch Manager, Delivery Agent, Customer Support                                | Security           | Done                                  | High               |
| 7    | Reports                      | Shipment Status, Agent Performance, Revenue by Branch, Customer Summary                        | Analytics          | Done                                  | High               |
| 8    | Dashboard                    | Courier Management Dashboard: donut, bar and column charts                                     | Analytics          | Done                                  | Medium             |

### Feature Summary:

| Metric                     | Count / Value                             |
|----------------------------|-------------------------------------------|
| Total Features Planned     | 8 (plus 6 future-scope items not counted) |
| Total Features Implemented | 8                                         |
| Core / Must-Have Features  | 6                                         |

| Metric                             | Count / Value                                                        |
|------------------------------------|----------------------------------------------------------------------|
| Additional / Nice-to-Have Features | 2 (Lightning App layout polish, Dashboard)                           |
| Features Tested & Verified         | 9 test cases (T01-T09) cover these features - update after execution |

### Feature Category Breakdown:

| S.No | Category       | Features in Category | Example Features                                     |
|------|----------------|----------------------|------------------------------------------------------|
| 1    | Data Model     | 2                    | Custom objects, Lookup / Master-Detail relationships |
| 2    | Automation     | 2                    | Validation rules, record-triggered Flow              |
| 3    | User Interface | 1                    | Lightning App, page layouts                          |
| 4    | Security       | 1                    | Profiles, roles, users                               |
| 5    | Analytics      | 2                    | Reports, dashboard                                   |
