

Performance Testing

Date	01 October 2026
Team ID	SWTID-2026-1564
Project Name	Courier Management System
Maximum Marks	5 Marks

Performance testing evaluates how the system behaves. For this Salesforce academic project, performance is reviewed by checking that common records open correctly, Flow execution completes without errors and reports return the expected records. Large-scale load figures are not claimed unless the team actually measures them.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Salesforce Lightning UI, Flow Debug / Flow Interview log, report run view
Type of Testing	Functional testing and basic performance review (manual, single-user)
Target Module / API	Customer and Shipment records, Delivery Update Flow, Reports and Dashboard
Test Environment	Cloud - Salesforce Developer Org
Test Date	[Enter the date you ran the tests]

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Create a valid customer; open the saved record	1 (manual)	N/A	Record saves and opens correctly (T01)
2	Create a Delivery Update for a shipment	1 (manual)	N/A	Flow completes without errors; Shipment status updated (T06)
3	Run Shipment Status report	1 (manual)	N/A	Correct shipment data displayed (T07)
4	Open Courier Management Dashboard	1 (manual)	N/A	Charts display configured report data (T08)

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	[Enter]	[Pass/Fail]	Time to open a record / run a report
2	Response Time (Max)	< 5 seconds	[Enter]	[Pass/Fail]	Slowest page observed
3	Throughput (Req/sec)	N/A	N/A	N/A	Not measured; managed by Salesforce cloud
4	Error Rate	< 1%	[Enter]	[Pass/Fail]	Flow errors / failed saves on valid data
5	CPU Utilization	< 80%	N/A	N/A	Managed by Salesforce platform
6	Memory Utilization	< 80%	N/A	N/A	Managed by Salesforce platform

Functional Test Cases (supporting evidence)

Test ID	Scenario	Expected Result	Status
T01	Create a valid customer	Customer record saves successfully	[Pass/Fail]
T02	Enter an invalid phone length	Validation message appears	[Pass/Fail]
T03	Enter a non-six-digit pincode	Pincode validation prevents save	[Pass/Fail]
T04	Enter zero shipment weight	Weight validation prevents save	[Pass/Fail]
T05	Enter a past expected date	Date validation prevents save	[Pass/Fail]
T06	Create a Delivery Update	Related shipment status is updated by Flow	[Pass/Fail]
T07	Create report	Correct shipment data is displayed	[Pass/Fail]
T08	Open dashboard	Charts display the configured report data	[Pass/Fail]
T09	Login as restricted user	Only permitted objects/actions are available	[Pass/Fail]

Fill the bracketed cells after you run the tests in your own org; the document does not claim results that were not measured.
