

Project Executable Files

Date	01 October 2026
Team ID	SWTID-2026-1564
Project Name	Courier Management System
Maximum Marks	3 Marks

This project is configured inside a Salesforce Developer Org, so the deliverable is the org configuration plus this documentation rather than packaged source code.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	NA (declarative Salesforce configuration)
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	Yes (object and field tables in project documentation)
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes (Salesforce org login URL - add below)
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes (Performance Testing document, T01-T09)
10	Demo video or walkthrough (if required)	[Yes / No - add link below]

Step 2: File / Folder Structure

```
Salesforce Org: Courier Management System
|-- Objects
|   |-- Customer__c, Shipment__c, Delivery_Agent__c
|   |-- Branch__c, Delivery_Update__c, Invoice__c
|-- Validation Rules (Customer, Shipment, Delivery Agent, Branch, Delivery Update)
|-- Page Layouts (one per object)
|-- Flows
|   |-- Delivery Update -> Shipment Status (record-triggered)
|-- Lightning App: Courier Management System
```

```
|-- Profiles: Courier Admin, Branch Manager, Delivery Agent, Customer Support
|-- Roles: Courier Admin > Branch Manager > Delivery Agent / Customer Support
|-- Reports: Shipment Status Summary, Agent Performance, Revenue by Branch, Customer Summary
|-- Dashboard: Courier Management Dashboard
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	[Paste your Salesforce org URL, e.g. https://yourdomain.my.salesforce.com]
Login Credentials (Demo)	[Provide demo username and password for evaluator access - do not share real personal credentials]
Platform / Hosting Provider	Salesforce (Developer Org, cloud-hosted)
Repository Link	[Optional - GitHub link if metadata is exported]
Demo Video Link	[Paste link if required]

Step 4: Run Instructions

- Open the Salesforce org URL and log in with the demo credentials.
- Open the App Launcher and select the **Courier Management System** app.
- Create a Customer, then a Shipment linked to that customer (tracking number is auto-generated).
- Assign a Delivery Agent and create a Delivery Update; confirm the Shipment status changes.
- Open the Reports tab and the **Courier Management Dashboard** to view results.
