

Scalability & Future Plan

Date	01 October 2026
Team ID	SWTID-2026-1564
Project Name	Courier Management System
Maximum Marks	1 Mark

Scalability & Future Plan:

How the Courier Management System can grow to handle more branches, records and features, and the roadmap beyond the current version.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Depends on Salesforce configuration and availability	System needs the cloud org to be available and correctly set up	Medium
2	Actual SMS, GPS and mobile features are not implemented	Customers cannot receive automatic notifications or live location	High
3	Permissions and licenses must be configured correctly	Wrong access settings could block or expose data	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Four user types in a developer org	Add users per branch with the same profiles and roles
2	Data Storage	Sample records in custom objects	Add more branches and records using the existing data model
3	Performance	Records, Flow and reports reviewed manually	Add branch-level analytics and review report filters regularly
4	Security	Profiles, roles and permissions	Review access periodically as more users are added

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	SMS or email notifications for shipment events; mobile-friendly shipment tracking	Short term	Customers stay informed without calling support

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 3	GPS-based delivery location integration; customer self-service tracking interface	Medium term	Live visibility and fewer tracking enquiries
Phase 4	Additional branch-level analytics; AI-assisted route and workload optimization	Long term	Better planning and faster deliveries

These are proposed extensions; they are not claimed as implemented.
